Following the success of Fashion Designers' Sketchbooks, this second volume shines a light on the work of a new line-up of major names in the fashion industry. Photographs, sketches, moodboards, lineups, muslins, swatches, and more all feed the creative processes that forge fashion designs, and here they are brought together to reveal how the final collections are conceived and developed. Juxtaposing the original research material and drawings with the garments shown on the catwalk and in lookbooks provides fresh insight into the working methods of leading international designers and the role of different media in creating their collections. Students and designers will find this a fascinating and invaluable resource as they develop their own work. Rick Owens, Clements Ribeiro, and Marios Schwab are just some of the prominent designers featured. Interviews in which they discuss the importance of their research run alongside their respective sketchbooks, providing an inspirational overview of cutting-edge approaches to fashion.
